THE REDCLIFF REVIEW

THURSDAY, MARCH 26th 1931

Number 30

Local Militia Successful

Good Crowd in Attendance and Enjoyable Evening.

Redcliff's newly renovated armory was the scene of a joyous gathering last Friday evening when the officers and N. C. O.'s entertained their friends to a most enjoyable social evening.

The first part of the Evening program was made up of musical numbers by Mrs. T. Balmer, and Albert Lien and short addresses by Capt. Osgood, as chairman and Col. Patterson, Capt. Hargrave, Rev. R. E. Pow and E. L. Stone. This part was interspersed with community singing which was heartily enjoyed by all present. Bert Allison also gave a recitation.

Col. Patterson reviewed the progress of the local unit since its inception and assured the audience that at present time it occupied a position second to none in the province in efficiency. This he said was largely due to the efficiency of its officers and the caliber of the men in the ranks. He assured the parents present that they should have no apprehension about allowing their sons to attend the annual camp as they were always under strict supervision and that the boys from Redcliff had always acquitted themselves in a manner which was a credit not only to the unit but to the town which they represented. "It was the object of the officers," Col. Patterson said, "to encourage among the boys the spirit of good wholesome sport," and he hoped the citizens of the town would be behind the officers in their endeavors.

Capt. Hargrave said that at the present time there were those who had a certain antipathy towards all kinds of what they interpreted as military training, but he thought it advisable to maintain at least a nucleus of defence just as policemen are maintained as a guarantee of the law and order with the present spirit of unrest which appears to be rampant and the tendency of some nations to have daggers drawn, it was quite possible that an unguarded word or a false step on the part of some nation might throw the whole world into another turmoil. It was quite possible under these conditions that Canada might, at any time, be called upon to defend her life and ideals and even her homes, and that in such an eventuality it was well for her to be prepared in some measure at least. Capt. Hargrave also expressed the wish that Mr. C. D. Scott, who was instrumental in inaugurating the first unit in Redcliff, had been present to enjoy the fruits of his labor as he felt sure the present position held by the local unit and the interest shown in it by the military authorities in purchasing and equipping the present armory, was largely due to the enthusiasm and interest shown by Mr. Scott and his associates at the start.

Mr. Pow and Mr. Stone commended the officers and men of the unit on the splendid show they had made in the past and said there was no doubt that it was because of their past record

Committee to Study The Compensation Act

In the legislature yesterday it was announced that a committee would be formed to study the whole question of the Workmen's Compensation Board. This is the outcome of a motion introduced by Col. F. C. Jamieson, Conservative member for Edmonton asking for an amendment to the Act providing for the right of appeal to the Supreme Court from any decision of the Workmen's Compensation Board, and that a member of the Law Society be appointed as Workmen's advocate to assist the appellant in the prosecution of such appeal.

LOCAL TALENT SHOW BY ST. AMBROSE ORIOLES

Bills are now out announcing a grand concert to be given in the Cameo Theatre on Friday, April 10th by the Orioles of St. Ambrose church. The program will be made up of peppy songs, of screaming monologues and snappy comebacks. Don't miss seeing it.

ord the military authorities and the government had seen fit to furnish them with excellent quarters. Both expressed the hope that the citizens of the town would give them the necessary support to insure the continuance of their splendid record.

After this part of the program the decks were cleared for action and pleasant social time was spent dancing.

During the evening a dainty lunch was served.

The Armory as at present held out furnished a splendid show for such a gathering with its spacious dancing space on the ground floor and its other conveniences on the top story. Many were heard to remark that it was hoped this was the forerunner of many similar organizations.

As the whole of the program was a most enjoyable

Additional Items of Local Interest

Jack Hope left last Tuesday for the Belcher hospital to undergo treatment.

Joe Delinks, of Bowell, shipped a car load of hoes to northern Saskatchewan last Tuesday.

... .. emigrants entered Canada last week during the first three months of 1930 than entered the United States from Canada.

Owing to the continued fine like weather many farmers in the district are now on harrowing and other spring seeding.

The Great Eastern Train Ferry, Limited, and one of the Great Eastern railways propose to establish a train ferry service between Richborough, Kent, England, and Calais.

There were more people killed in United States in 18 months by Auto Accidents than that country had killed in the Great War. 50,500 were killed by autos in that period.

Speaking of the charms of Canadian women and girls Lord Willington reminded a London Audience that four of his aides de camp had married Canadian girls.

There will be a meeting of the Harvest Vale U. F. A. local on Saturday evening of this week, or not are invited to attend as matters of importance will be discussed and as favorable news will be disclosed.

Cattle exporters in Ontario and the west estimate that between 15 and 20 thousand cattle will be shipped from Canada to Britain this summer. It is expected that by 1932 it will be possible to ship by Port Churchill, which will greatly lower the cost from the prairies.

As Friday, April 3rd, will be Good Friday all the stores in town will be closed for the day.

Vega Rehekah Lodge officers are putting on a whist drive and dance in Cliff hall on April 6th.

Canada's new Governor General accompanied by Countess Beasbrough will arrive at Halifax on April 4th. He will be met at Halifax by Premier Bennett and after being sworn in will proceed to Ottawa.

Last Tuesday L. Cahoon received the sad news of the sudden death of his brother Dennis, at Owen Sound, Ont. Deceased was 39 years of age and was well known in this district, he was in the lumber business in Medicine Hat about 20 years ago.

Chas. Kemp, who has been spending the past few months visiting at his old home in Scotland, returned home last Saturday. Mr. Kemp reports a most enjoyable visit with his mother, other members of his family and old friends.

The choir of St. Barnabas, of Medicine Hat, will render "Olivet to Calvary" by Maunders, in St. Ambrose church Redcliff, on Tuesday night, April 2nd at 8 o'clock. This splendid choir will be well worth seeing in this wonderful service. Everyone is cordially invited to attend. Don't forget, St. Ambrose church on Thursday night at 8 o'clock.

It has been suggested to the Review that it would be a good idea to have the town staff go around all the brick crossings in town with a good heavy sledge hammer and flatten out the bricks which have worked their way on through the covering earth or have been exposed through the blowier away of the covering. At present some of these crossings are in bad shape.

Highschool Pupils Entertain Visitors

Three Classes Act Their Literature Selections.

High School pupils entertained visitors and friends to a most enjoyable hour in their room last Friday afternoon.

In a very creditable manner the pupils of the three classes dramatized one of their literature selections and three judges were asked to decide which of the three had portrayed their respective character best.

Junior class presented the scene from "The Gorgon's Head" the intermediate class presented the Monastery scene, and the senior class Mr. Slope's prequel from the "Barchester Towers".

So well were all three selections put on that the judges, who were Messrs. K. E. Pow, A. H. Hargrave and E. L. Stone, experienced some difficulty picking winners. However it was decided, taking all the characters into consideration, that the junior class had the best balanced, and all characters in it were a little better than the others two.

Mr. Brown as chairman welcomed the visitors and said the good attendance was a good sign as it showed parents were interested in the pupils and their studies. This was encouraging both pupils and teachers.

Margaret Pow read the school paper and also gave a synopsis of the lessons to be acted.

Louise Smith gave a recitation in a very pleasing manner. Four girls, so decked out that they were unrecognizable, sang a quartette, and four boys gave an instrumental number. Margaret Johnson entertained to a short story. There was a splendid attendance of visitors and all thoroughly enjoyed the program.

Auditors representing G. A. Touché Co. have been in town the past week auditing the books of the Dominion Glass Co.

Council in Committee To Consider Wages

Commission Approves of The Estimates Set By Town

At the regular meeting of the Town Council held last Monday evening a letter was read from the Utilities Commission approving of the estimates set by the Council and School Board.

On motion of councillor Shaw and Champ, B. P. Scanlan was appointed assistant assessor.

Dr. Patterson wrote offering \$50.00 for building on lot 16, blk 55. The offer was accepted.

A committee representing the local Oddfellows lodge was present and offered \$300.00 for the old Crow building on Broadway. The offer was not accepted.

Three offers for buildings in town were left over till the next meeting for consideration.

On motion of councillors Lafolle and Sangster the secretary was instructed to write all tenants in town houses who are in arrears of rent, informing them to vacate same unless rent is paid in full at once.

The action of the Waterworks committee in connection with the pump station, was endorsed.

On motion of councillors Dacre and Shaw, council went into a committee of the whole to discuss the matter of salaries and wages. As the committee of the whole did not take place till after the regular council meeting the committee of the whole did not report its findings back to council. This will probably be done at next regular meeting.

Mary Pickford and Fairbanks Coming

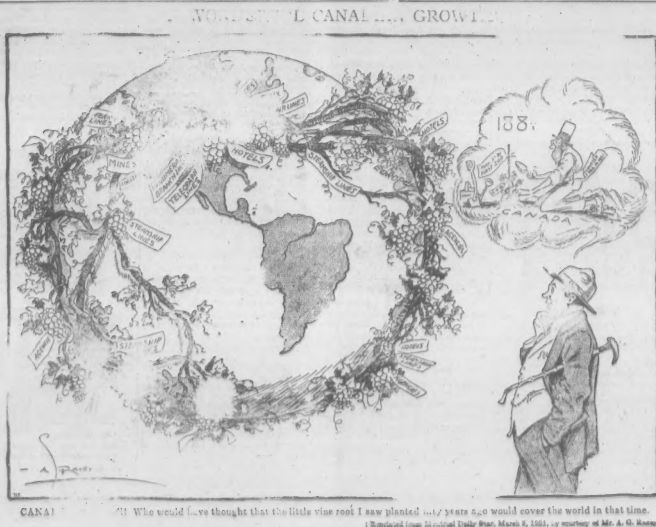

Redcliff people will be glad to learn that Mary Pickford and Douglas Fairbanks are to appear in the picture at the Cameo next Wednesday in the always popular Shakespearean play: Taming of The Shrew. Young and old will enjoy this picture by such talented movie stars.

WARNING

Prairie And Forest Fires

In those sections where an unusual fire hazard exists due to lack of moisture in the soil it is important that every person should comply with the requirements of The Prairie Fires Act and the restrictions as to obtaining permits before starting any fire in a fire district.

Where it is necessary to burn stubble, weeds, straw stacks, brush piles, meadows, or any other matter, whether a Fire District or not, The Prairie Fire Act requires that material that is to be destroyed by burning, shall be surrounded with a fire guard not less than ten feet in width consisting of land covered with snow or water or being so worn, graded, ploughed, burned over or covered with water as to be free from inflammable matter, and such fire shall be guarded by three adult persons provided with the proper appliances for extinguishing such fire. After the 7th day of May the fire guard shall not be less than twenty feet in width. Fires burning in the ground shall be extinguished or so surrounded as to prevent any possibility of escape.

CANAL

"Who would have thought that the little vine root I saw planted many years ago would cover the world in that time."

WORLD HAPPENINGS BRIEFLY TOLD

Canadian Indians, in 1929, numbered 108,012, the Department of Indian Affairs reports. One-half are listed as Roman Catholics.

The council of London, Ontario, has decided to support the Winnipeg resolution favoring the getting aside of the day after Christmas as a holiday.

More than \$35,000,000 was spent by the British Government in the last fiscal year to help finance projects for providing work for the unemployed.

More definite protection for the agricultural debtor from foreclosure was sought by the board of the United Farmers of Canada, in session recently at Saskatoon.

The Reverend John Hyde, 61, and his wife, 52, Nottingham, England, celebrated their silver wedding anniversary by painting the final tests for pilot certificate after 18 months of training.

February, 1931, will go down as the lowest February for the collection of national revenue in Montreal since the war. Only one other month, January, 1929, had lower collections than did February of this year.

The "rock pile" will be restored to all Ontario reformatories and police in the belief that reformation is best accomplished by hard and productive labor. Prisoners will be provided with goggles to prevent the danger of eye-injury.

Radio Gaining in Popularity

493,170 Receiving Sets in Use in Canada At End of January

At the end of January there were 493,170 radio receiving sets in Canada, under license or about one radio for about 20 persons in the country. The total of licensed receiving sets at the end of January was 99,000 more than the number in use at the end of the 31st month period at the Canadian Government fiscal year 1929-30. Toronto has more radios than any other city, with 77,194 at the end of the first month of this year. This total is nearly 15,000 more than was registered at the end of March, 1930, the close of the government fiscal year. Montreal is credited with 41,378 sets; Hamilton, Ont., with 16,932; Vancouver, with 19,530, and Winnipeg with 10,433. A charge of \$1 per year is made by the Canadian Government for a license for a radio receiving set. Licenses are issued free to the blind in Canada and the latest report shows 499 such licenses have been issued.

Popular Tunes in Movies

Producers declare that really attractive films fail to draw at the box office. Those who are demanding "art" in motion pictures seldom are willing to risk their money in experimentation. The film theatre is not like a store where one may stock grades of goods to suit all tastes. The only successful movie house is one where a large percentage of the films shown please a majority of the patrons. — Los Angeles Times.

Birds rained in Argentina last year weighed 33,000 tons.

Palpitation Of The Heart Nerves Wore All Gone

Miss Rose Griffin, Ashern, Man., writes: "About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Price 50c a box

Cut Down Food Wastage

...by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them. You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less wasting uses. At grocers, druggists, stationers.

COVERTS CAMPBELL'S RECORD

Norman "Winap" Smith, Australian speed king, who, shortly makes an assault upon Capt. Malcolm Campbell's world land speed record of one hour, driving a car now under construction in Sydney and with speed tests in New Zealand.

Many Divorces in Canada

Eight Hundred and Seventy-Five Divorces Granted in Canada This Year 1930

A total of 875 divorces was granted in Canada during 1930, according to a return issued by the Dominion Bureau of Statistics. Of this number 247 were granted by the Dominion Parliament, and comprised marriage dissolutions in Ontario and Quebec. The remainder were decreed by the various courts of the other six provinces involved. No divorces were granted in Prince Edward Island, which province has had only one marriage dissolved in that fashion since confederation.

British Columbia headed the list for 1930 divorces, the figures in the Pacific Coast province being 235. Ontario had 207; Alberta, 151; Manitoba, 114; Saskatchewan, 62; Quebec, 40; New Brunswick, 27; and Nova Scotia, 19. This total of 875 was 59 more than the previous year, and was the largest in the country's history. Since 1913, a total of 7,756 divorces have been granted in the Dominion.

Manitoba Mining Industry

Over \$62,000,000 Is Now Invested In

Hon. D. G. McKeown, Minister of the Department of Natural Resources for the Province of Manitoba, reports a twenty per cent. increase in Manitoba's mineral production for 1929 over the previous year, the total production amounting in value to \$5,425,824.

Capital invested in the Manitoba mining industry is now computed to be over \$62,000,000. The year 1930 was the best yet in the mining history of Manitoba in the matter of advances towards mineral production. Mining expenditures that year were 15 per cent. over the previous year's figure of \$12,500,000.

Railways and Air Routes

Joint Rail and Air Services May Be Future Development

Air developments, more particularly as they affect the operations of a large transcontinental transport system, are being closely watched by the Canadian Pacific Railway with a view to the inauguration of joint service, when the time is considered opportune. It was stated recently by E. W. Beatty, president of the Canadian Pacific Railway.

"If the development in air services, which is progressing satisfactorily, demands joint rail and air services, they will undoubtedly be provided by the Canadian railways," said Mr. Beatty.

Shrimp in Watch Industry

The watch-making crisis in Switzerland appears to have been reached. July, 1930, was the poorest month in years, only 114,000 cases being turned out. But the heaviest decline has been in pocket watches and automobile clocks. The clocks, most of which in former years were exported to the United States, have nearly disappeared from the market.

An archaeologist states that until eighty years ago, almost all the known remains of ancient Babylon and Nineveh were in a little glass case in the British Museum.

It is predicted that constables may eventually find their way into the manufacture of poisonous gas, insulating material, and similar products.

Poland's population has just been estimated at nearly 25,000,000.

Palladium Medal

Wollaston Medal Of Geological Society Of London, Is Made From Rare Metal Mined In Canada

The Geological Society of London's 101st Wollaston Medal was recently presented at Burlington House, London, England, to Dr. Arthur William Rogers, director of the Geological Survey of South Africa, according to word received by the International Nickel Company, of Canada, Ltd.

Awarded annually by the Society with the object of promoting research concerning the mineral structure of the earth, the medal this year is unique in that it is made of palladium which is mined in Canada, instead of such other precious metals as gold or silver. Palladium, which is a non-flammable precious metal of the platinum group closely resembling silver in color, was discovered by Dr. William Hyde Wollaston, F.R.S., P.R.S., in 1805.

The metal was presented to the Society by the Mount Nickel Company, Ltd., who are important producers of that and other metals of the platinum group. In a speech at the presentation dinner, Mr. D. C. Evans, delegate director of the Mount Nickel Company, said remarkable progress had been made in the world's production of palladium since Wollaston's days.

The palladium used in the medal, he said, had been derived from the Company's vast resources in the nickel-copper ore regions of Ontario. These Canadian ores, he said, were worked primarily for their nickel content, palladium, had been recognized by other metals being a by-product. He said the International Nickel Company, of Canada, Ltd., of which Mond is a subsidiary, could now produce upwards of 100,000 ounces of palladium a year, which would represent a substantial proportion of the world's total production.

New Radio Treatment

Professor Stiechock, of the Vienna polytechnic, recently has been using kilowatt radio transmitter for treatment of inflammation of the lungs such as is associated with influenza; cases of cancer and internal separation. He claims to have had encouraging success.

Smallest Working Locomotive

What is claimed to be the smallest working locomotive in the world, made by J. J. Langridge, of Riverside, Iowa, is exhibited at the Winnipeg and District seventh annual convention, Winnipeg, England. The model, which runs by electricity, can be almost entirely covered by a postage stamp.

Tuberculosis Among Indians

Appeal To Parliament For Additional Funds To Combat Disease

Special appeal to parliament for additional funds with which to combat tuberculosis among Indians was forwarded in the 1930 report of the Department of Indian Affairs. "There are several reserves," the report said, "where the number of infectious cases is so small that the disease might be stamped out if it were possible to devote the whole of the appropriation for this purpose to these reserves. But equally strong appeal for help comes from almost every reserve. At the present time it is being found necessary to refuse applications for sanatorium treatment."

Tuberculosis was described as the most potent disease to which Indians were victims. The report regretted that more progress was not being made in combating the progress. "There are several reserves," the report said, "where the number of infectious cases is so small that the disease might be stamped out if it were possible to devote the whole of the appropriation for this purpose to these reserves. But equally strong appeal for help comes from almost every reserve. At the present time it is being found necessary to refuse applications for sanatorium treatment. Due to lack of funds for maintenance. The department appeals to the House of Commons for funds with which additional personnel and facilities may be provided. The proper course undoubtedly is to attack the disease in its weakest places, namely on reserves where there are small numbers of cases, and where the resistance of the Indians to it is relatively high."

Effectiveness Of The League

Building Up Friendship And Understanding Among The Nations

In a tentative, plodding sort of way it goes on month after month building up friendship and understanding among the nations. Even Uncle Sam has been repugnant to the latest "monthly summary" of the League's doings to hand records the election of Frank B. Kellogg in succession to Charles Evans Hughes as a member of the Permanent Court of International Justice. Other events of the month were the signing of a Treaty of Friendship between Sweden and Persia and the settlement of an argument between Germany and Czechoslovakia about the use of the port of Hamburg. Little things, of course; but they help.

To many intelligent people of this generation war is no doubt inevitable, but there was a time when small-pox and other terrible plagues were inevitable, too. By sanitation and vaccination, however, these scourges have been robbed of their terrors. The League of Nations is a laboratory in which vaccines and prophylactics are being prepared against war. To suggest that they are bound to prove useless is to discount the prospective patients and weaken their moral resistance. — Sydney, N.S.W., Bulletin.

Reindeer in Alaska now number more than 1,600,000 head.

Has Freak Eyesight

Objects At Close Range Magnified One Hundred Times

The eyes of Alva Mason, 25, an electrician of Mont. Me., are so focused that objects within a distance of eight inches are magnified more than 100 times their actual proportions. For ordinary work Mason has to use glasses that de-magnify and another person looking through these spectacles might just as well be gazing through the wrong end of a telescope.

Objects more than eight inches from Mason's naked eyes appear shrunken, but at a closer range he can even distinguish photographs records by the difference in impressions made in the discs. Removing his glasses, he can pick up unloading accuracy to the recorded snail's strokes in the "Anvil Chorus From Il Trovatore." Mason does not have to hear a record to determine whether or not a song was sung in a staccato or crooning manner. The sound grooves appear to him as the track made by dragging a finger through soft mud seen to the ordinary naked eye.

Bored of the skin and the infinitesimal holes in newspaper are quite anxious to Mason when he discards his glasses necessary for the greater part of his work.

Size Of Bee Colony

An interesting experiment has been under way for the past five years to determine the approximate field force of a normal colony of bees. During this period, thirteen calculations have been made by officers of the Department of Agriculture, the figure varying from 21,187 to 29,657, but only on two occasions did the number fall below 31,000. It is reckoned that approximately 5,000 bees weigh a pound.

Fruit acids, paradoxically, counteract the acid effects of certain foods in the diet.
